Tip or Complaint: Presto-x was hired by my employer to come in and spray bedbugs on July 7th, 10th, 21st, 22nd, and August 3rd. Per labeling and msds sheets the product used (Bifenthrin) was oversprayed. Labeling states that product is not to be sprayed but once ever seven days (Federal law per EPA) and the sprayed July 7th and 10th two days, July 21st and 22nd only 24 hours between sprays. Also this was to be a crack and crevices only, which documents show product on desk tops where food, drinks and personal items were. Spray mist could be felt on my shoulders as well as they sprayed a co-workers feet. 45 people exposed. OSHA found merit in investigation that stated Presto-x did not spray per labeling.
